Experience

hiberus, Junior Appian Developer
February 2022 - Present, Valladolid, Spain

Digitalization and re-engineering of processes in Appian for different clients in the public administration, integrating new systems and processes with legacy systems and adding value to the processes including data visualization and user activity dashboards.

hiberus, Junior Software Developer
June 2021 - February 2022, Valladolid, Spain

Development of several POCs and applications for internal use and procurement processes in *OutSystems* and *Appian*. Training in both technologies.

Development of web applications using *Angular* with *TypeScript* (TS) and reactive programming technologies (RxJS and *Redux*) for the frontend, and *NestJS* with TS and *TypeORM* for the backend.

hiberus, Training in the Work Center as Frontend Web Developer
March 2021 - May 2021, Valladolid, Spain

Training in the Work Center as a frontend developer developing modules and components in *Angular* with programming language *TypeScript*, which included reactive programming technologies such as *RxJS* or *Redux*.

CEZ w Stalowa Wola, Training in the Work Center as Technical Support
March 2019 - May 2019, Stalowa Wola, Polonia

Training in the Work Center was carried out in Stalowa Wola, Poland thanks to an ERASMUS + FCT scholarship. In this educational center I performed technical support functions. I also maintained the *Windows 2016* servers.
